-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 44 and 48-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cohen in view of Isobe et al.

In Cohen, see base control circuit 110, base transmitter 212, base receiver 210, remote unit 170 having a remote receiver 310 and a remote transmitter 312, a signal processor 200, and remote switch 318. It is clear from the entire specification of Cohen that the base unit and the remote unit contact each other continuously while within range. While Cohen specifically states that his device is used to close a door after the remote control has left receiving and transmitting range, it would have been well within the purview of one of ordinary skill in the art that communication between the base unit and the remote units could also serve to open the door upon reentry of the remote unit into base unit range. The concept and technology presented by Cohen are the same. Consequently, movement into and out of range effects opening and closing, depending on the last stored position, of the door.

What is not shown is use of two remote units. However, such is well known as illustrated by Isobe et al at 11,11a. It would have been obvious to provide Cohen with two remote units so as to be usable with two vehicles. Programming the units so that

one or both remote units are communicated with together is clearly within the scope of Cohen.

Applicant's arguments have been fully considered but they are not persuasive.

As stated above, Cohen has devised a system wherein a base unit and remote unit reciprocally communicate. This is the concept presently claimed. Modifying Cohen whereby his units communicate at all times so as to open as well as close the door is well within this concept.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
